Noble Iroh

Kingnoble0024@gmail.com |UK

Cyber Security and GRC professional with hands-on experience in control testing, risk analysis, and compliance across financial services and consulting environments. Currently growing exposure to AI governance and emerging technology risk. Comfortable working across regulatory frameworks, translating requirements into practical, evidence-based control assessments. Motivated by the intersection of risk analysis, assurance, and enterprise resilience.

EDUCATION

Teesside University | *MSc Degree: Artificial Intelligence with Advanced Practice* — Middlesbrough, UK | 2025 - 2027

Babcock University | *BSc Hons Computer Science: 2:1 (Second Class Upper)* — Ogun, Nigeria | 2019 - 2023

WORK EXPERIENCE

NorthStandard | *Cyber Risk Intern* — Newcastle, UK | Jul 2026 – September 2026

- Supported the Enterprise Resilience function across Cyber Risk & Information Security, Operational Resilience, and Outsourcing and Supplier Governance activities.
- Led user access reviews across 8 core business systems ahead of external audit assessing users, admins, and leaver accounts against least privilege, and running stakeholder calls with business owners to confirm access levels while directly supporting audit readiness and closing remediation gaps.
- Developed Terms of Reference across the technology and cyber control environment, defining testing objectives and evidence requirements that fed directly into the organisation's quarterly control testing cycles.
- Reviewed cyber and technology policies against recognised frameworks and regulatory expectations (CIS Controls v8, DORA, MAS), working with control owners to validate control design and operating effectiveness through walkthroughs.
- Led independent risk reviews of AI agents - ChatNS and Microsoft Copilot where meetings with platform owners was organized to understand architecture and data handling, identifying AI-specific risks, assessing existing control coverage, and recommending next steps and establishing a repeatable assessment approach for future AI tool reviews.
- Designed and built the Enterprise Resilience intranet page, presented to department leadership for publication, improving visibility of the team's structure and functions across the organisation.

ISACA - 2026 Student Summit (IT Bowl) | *1st Place* — UK | Feb 2026

Team Lead Contributor

- Competed in a global IT governance, audit, and cybersecurity competition hosted by ISACA.
- Applied CISA-aligned principles across risk management, IT controls, governance, and security scenario-based challenges.
- Coordinated team tasks, validated answers, and structured responses under strict time constraints.
- Led collaborative problem-solving efforts contributing to a 1st place finish among participating students.
- Awarded an official Credly 1st place digital badge and education stipend in recognition of performance excellence.

High Tide Group | *Cybersecurity Administrator – Intern*

Hartlepool, UK | Jun 2025 - Sep 2025

- Led Cyber Essentials audits for multiple SMEs, identifying security gaps and recommending actionable remediation measures.
- Designed and standardised a baseline audit questionnaire, streamlining security assessment processes across clients.
- Conducted in-depth security and compliance assessments aligned with industry standards, including NCSC guidance.
- Maintained comprehensive documentation, audit trails, and incident readiness reports to support regulatory compliance and organisational resilience.

MEMBERSHIPS

- ISACA Northern England Chapter, UK
- ISC2 Lagos Chapter, Nigeria

CERTIFICATIONS & ACHIEVEMENTS

- Certified Information Systems Auditor (CISA) – ISACA
- Certified Information Security Manager (CISM) – ISACA
- ISO 42001 Lead Implementer (AI Management System)
- ISC2 Certified in Cybersecurity (CC)
- CompTIA Security+
- 1st Place - ISACA 2026 Student Summit (IT Bowl), awarded official digital badge and education stipend.

SKILLS

IT risk assessments, IT security audits, GRC frameworks, control testing, policy review, data protection, risk management, access controls, information security, cybersecurity assurance, data analytics, Python, IAM management, documentation, attention to detail, team collaboration.
